SUMMARY

Full-stack Developer is what I want to do. I have worked with both front-end and back-end development of websites and applications. I enjoy working on both front-end & back-end technologies. I possess critical thinking skills and being adaptive; and I have a great love for learning new things.

EDUCATION

Kasetsart University Kamphaeng Saen Campus | 2022-2026
Bachelor of Science Program in Information Technology | GPA: 3.17

EXPERIENCE

JOS TECHNOLOGY CO., LTD. | Cooperative Education Intern (Nov 2025 - Mar 2026)

Transport Management System (TMS & TMS Mobile)

- Developed mobile driver interfaces, implementing GPS caching and route polyline generation for real-time tracking.
- Redesigned system dashboards to enhance UI/UX, ensuring a clean and modern user experience.
- Developed logistics management platform for vehicle, driver, order and route management.
- Built RESTful APIs using Flask and MySQL.

Production Management System (PMS) **January 2026**

- Architected a Centralized Authentication and Single Sign-On (SSO) system to seamlessly integrate PMS, WMS, and TMS platforms.
- Designed database schemas for WorkOrder and WorkPhase tables, and implemented custom soft-delete logic excluding timestamp renaming.
- Designed and developed a production management system from requirement analysis to deployment.
- Implemented Sales Order, Work Order, Machine Management and Quality Control modules.
- Developed full-stack web application using React, Flask and MySQL.

DaekraidbyKU **June-October 2025**

- Built a meal planning and nutrition platform with Vue, Node.js, Prisma, and MySQL.
- Implemented authentication, meal planning, favorites, and inventory tracking.
- Developed budget-based meal planning and nutrition reporting features with dashboard and chart visualizations.
- Added budget tracking, nutrition reports, AI menu generation, and Google Maps integration.
- Designed and maintained a relational database schema for users, menus, meal plans, favourites, and notifications.

Movie Ticket Booking Application

- Flutter, Firebase, TMDB API
- Developed a cross-platform movie ticket booking application using Flutter.
- Integrated TMDB API to display movie information, posters, ratings, and trailers.
- Implemented Firebase Authentication for user login and registration.
- Developed seat reservation, booking history, and cancellation features.
- Designed booking workflow including showtime selection, seat selection, and booking summary.
- Managed cloud-based booking data using Firebase.

SKILLS

Programming Languages

- JavaScript , Python , Dart , TypeScript , C , C++

Frontend

- HTML, CSS , React ,Next ,Vue , Vite , Next,js

Backend

- Node.js , Nest.js, Restful API , Flask , Redis

Tools & Design

- Git , Docker , Postman , Dbeaver , MySQL Workbench , Visual Studio Code , Figma ,Claude Code , Google Stitch

Database

- PostgreSQL , MySQL, MongoDB , Redis

Soft Skill

- Problem-solving through practical experimentation
- User-oriented application design mindset
- Rapid self-learning and adaptability
- Strong interest in software development and technology

Languages

- Thai: Native
- English — Technical reading, basic communication
- (TOEIC 500)
- Chinese — Basic Pinyin reading
